

Polyhouse Automation System

AdvanceTech is proud to introduce a new generation of Polyhouse Automation system with this You can control or supervise your things like ac, humidifiers, heaters, geysers or any heavy AC load over the internet from anywhere in the world.

APPLICATIONS

- Connected to the internet using Wi-Fi.
- Here you can also supervise the things which are on or off.
- You can store your data for analytics on our cloud services.
- Controlling the Heavy Loads as per customer's requirement (220v to 240v, up to 50A).
- Visible UI on the Computer System or Smartphone (Using Node-red or android application, web applications).
- Real time Monitoring of Data Like: -
 1. Temperature
 2. Humidity
 3. Rainfall
 4. Light Intensity
 5. Wind Speed
 6. Wind Direction
 7. Soil moisture

- For communication, we are using fully safe and secure communication protocols so that your site and devices should be safe and secure.
- Hardware - for controlling heavy ac-loads we are using industrial standard contactors for switching load on and off,
- We also worked on the privacy of the product so the other victim or member cannot interfere without your permission.
